Easy Conveyors is a manufacturer of modular conveyor systems. Our product range consists of components for belt-, mat top-, table top- and roller conveyors.

SHORT DESCRIPTION

Roller conveyor systems are efficient modular solutions for product transport in the automation and logistics industry. The system is based on aluminium profiles and combines high system flexibility with functionality.

The frame profile is already provided with slotted holes, which makes it easy to mount additional equipment, such as photocell sensors, lateral guidance equipment and support stands.

The roller frame profile has a side cover, allowing the electrical wiring to be easily concealed by a removable plastic cover. The roller conveyor system includes powered and free-running roller conveyors, curves and accessories.

Poly-V driven RCB PV series with transfers

ROLLER CONVEYORS

We develop and produce roller conveyors based on modular components for warehouses and distribution centres worldwide. We believe in standardisation in order to offer our customers the best prices, excellent quality and short delivery times.

We offer the following products based on modular components.

- Non-powered roller conveyor
- 24V poly-V roller conveyors
- 24V round belt roller conveyors
- 24V belt over roller conveyor
- 400V flat belt roller conveyors

THE BENEFITS AT A GLANCE:

Galvanised rollers with a standard diameter of 50 mm. Available roller lengths (RL): 420, 520, 620 and 820 mm.

Roller conveyors are used especially for complex automated conveying installations. These include distribution and accumulation operations, and integration of automated procedures such as labelling, printing, strapping, etc.

The conveyor systems are designed to be very easy to assemble, install and maintain with simple hand tools. Due to the modular aluminium construction of the roller conveyor, the installation can easily be expanded or adapted to changing capacity requirements. This means a considerable saving of assembly costs for the dealer or in the case of self-assembly.

Our specially selected and fully trained dealers are able to assist, advise or support you in all technical or commercial aspects of our products.

To find out more about our product options and prices, please contact your local dealer (part of our extensive worldwide dealer network) or visit our website www.easy-conveyors.com.
